# Exporting and Importing Profiles into the Intel PROSet Wireless Supplicant
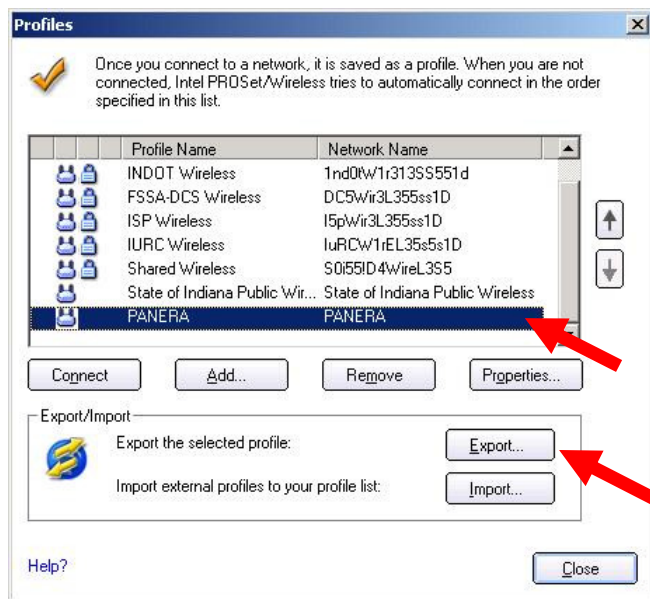

Exporting Profiles

Open the Intel PROSet Wireless Supplicant by double-clicking the icon in the SysTray or by clicking Start >> All Programs (or Programs) >> Intel PROSet Wireless >> Intel PROSet Wireless.

The supplicant window will open and will look similar to the window below. Click Profiles.

The profile window will open and look similar to the below. Click the profile(s) you want to export and click Export. In this case I have chosen to export PANERA.

The Export one or more profiles window will open. Click Browse to choose a location if you want to save the profile in a different location than is shown.

Choose a location to save your file and then click Open. In this case, I have chosen the Desktop. You may choose any location you wish. Be sure to remember where you exported the profile to.

The Export one or more profiles window will open again with you chosen storage location. Click OK.

You will get a confirmation window showing that the export was successful.

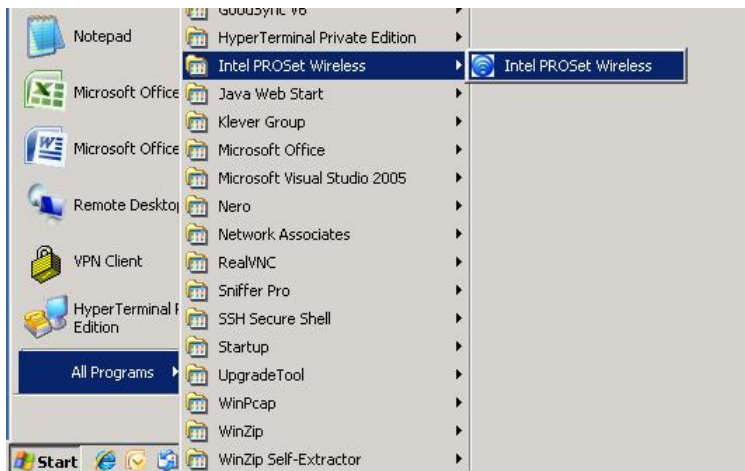

You will see an icon similar to this one with a p10 file extension in the location where you exported.

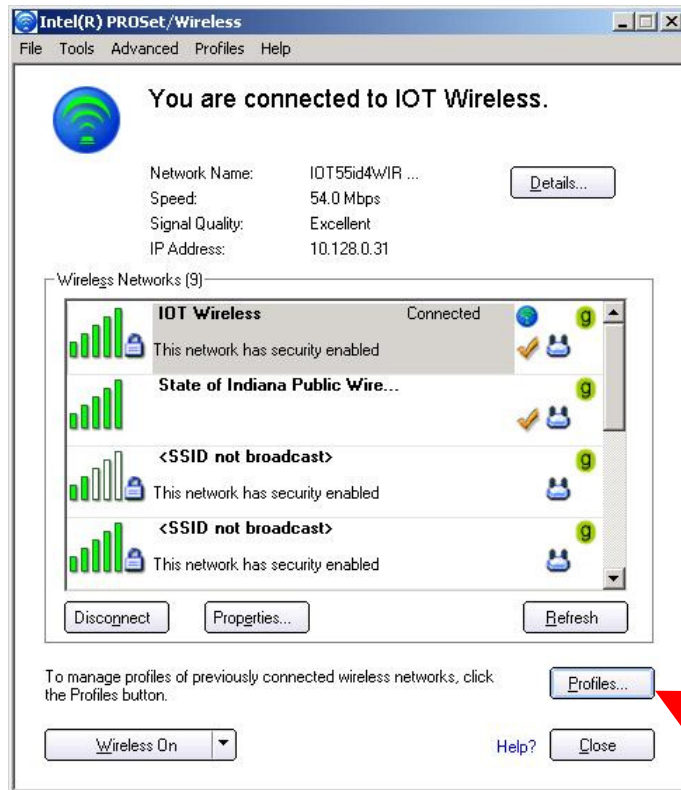

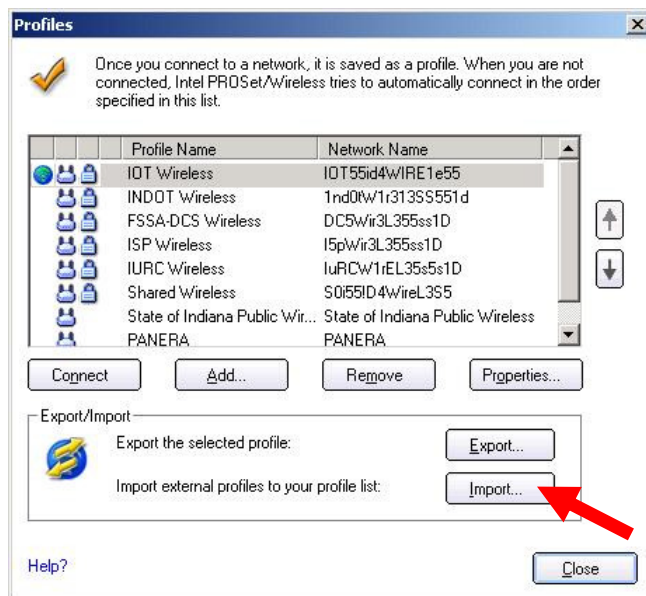

Importing Profiles

Open the Intel PROSet Wireless Supplicant by double-clicking the icon in the SysTray or by clicking Start >> All Programs (or Programs) >> Intel PROSet Wireless >> Intel PROSet Wireless.
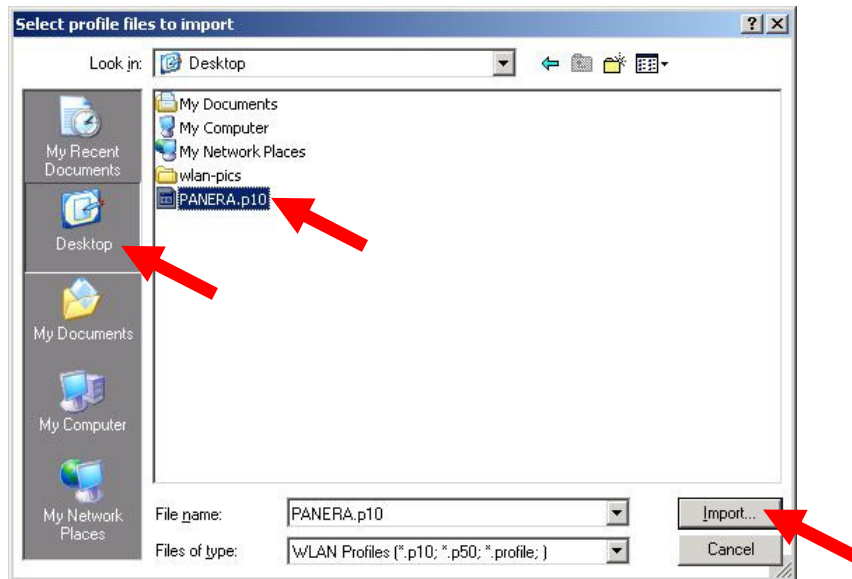

The supplicant window will open and will look similar to the window below. Click Profiles.

The profile window will open and look similar to the below. Click Import.

The Select files to import window will open. Select the file location where your profile is stored. Click the profile to highlight it and click Import. In this case, I have chosen the Desktop and PANERA.p10 to import

You will see the confirmation window below when your import is successful.
